by phone at 703-759-7803

Class Outline

"This is probably the best course I have ever attended regarding digital imaging..."

Photoshop can be a powerful resource in the forensic video analysis workflow. Adobe Photoshop for Forensic Video Analysts is a 4-day class that is designed to introduce and build upon image processing techniques for the Forensic Video Analyst. This thorough workshop is recommended for analysts with limited experience using Adobe Photoshop, those using previous versions, or for those wishing to learn the new powerful features of Adobe Photoshop CS5.

In this four-day hands-on workshop, you will be introduced to the key features of Adobe Photoshop CS5 and Adobe Bridge for use in the Forensic Video Analysis process. You will explore best practices for image processing and learn the more advanced tools used in the forensic video analysis workflow including:

- ◆ Using sophisticated automations and actions to process images from video evidence
- ◆ Employing custom filters for deblurring, sharpening and pattern elimination techniques
- ◆ Applying color isolation processes for image clarification
- ◆ Employing layer modes to build image processing levels
- ◆ Using Adobe Photoshop CS5 Extended to apply processes over multiple video frames

Students are expected to bring a laptop to class with the Adobe Photoshop CS5 software installed. A trial version is available from the Adobe website. For more information contact Training@resvid.com
